

1. Jose Rivas, Attorney in Orlando, Fl (407-644-2466)

Letter from a patient:

**Miller Findley
Augusta, GA**

Dear Dr. Wheeler,

I would like to take this opportunity to express to you how my life and health changed for the good as a result of meeting you and the medical treatment I received under your care.

When I came to you, my PSA was 6.5 and on the increase. After receiving treatment from you my PSA was less than $< 0.01 >$ and has remained less than $< 0.01 >$ for over two and one half years. My local doctors are amazed at my results and health.

My patient-doctor relationship with you was outstanding. You exhibited to me the highest level of professionalism and care as your patient as I have ever experienced from any doctor. Your character was impeccable. Your Christian values expressed to me a genuine concern for the patient and for the sanctity of life which meant a lot to me. You showed this to me through sincere concern for my well-being and health both as an individual and patient.

I came to you with a medical condition and a depressed outlook for my future. There is no doubt in my mind your care and treatment saved my life. I left after your care and treatment as a healed individual that had been set free to live a full and long life. I am and will be forever grateful to you for my health and well-being.

**Blessings,
Miller**

**-EDITORIAL COMMENT: (2012) By Stephen W. Leslie, MD FACS
(Urologist & Assistant Professor of the Department of Urology at
Creighton Medical School)**

The widespread incidence of prostatitis is well known to urologists and other doctors, but its association with prostate cancer has previously considered incidental. In this chapter, Dr. Wheeler has suggested that prostatitis may (actually) cause prostate cancer based on evidence supportive of inflammation leading to cancer consistent with several other organ cancers, the research of the American Association of Cancer Research, David Bostwick, Michael Karin, PhD and others. While the association alone between these two conditions may fall short of being considered definitive, it is certainly plausible and deserves more study. Even a limited causative link between prostatitis and prostate cancer would cause a dramatic change in our attitude and approach to prostatitis.

Currently, prostatitis therapy consists primarily of antibiotics, alpha blockers, and other drugs. This chapter correctly points out that these remedies are often inadequate. Dr. Wheeler recommends considering nutritional agents in the absence of successful definitive therapy. Although nutritional therapy has been widely used and studied in Europe, it is not routinely recommended by many U.S. physicians for several reasons. Nutritional therapy is not taught in most U.S. medical schools and many American physicians are unfamiliar with the available scientific research on the subject. Published studies on nutritional therapy are criticized for using different preparations and dosages, having too small a sample size with limited numbers of participants, being of inadequate duration, and bias in the selection of patients to be tested. Commercially available nutritional therapies are usually not manufactured to a pharmaceutical grade standard, which each bottle, even from the same company, may have different biological effects. There is no universally accepted dosing schedule for many of these natural remedies and their mechanism of action is often unknown. Further, no specific combination nutritional products for either prostatitis or symptoms of prostate enlargement has ever been properly tested in a well-designed, scientific study.

Dr. Wheeler describes a study he performed at the Diagnostic Center for Disease on a unique combination nutritional therapy called Peenuts*. He reports outstanding objective and clinical results, but the scientific details of his research need to be carefully reviewed and his findings duplicated by other medical experts. If further research indicates he has indeed found a safe and highly effective therapy for the signs and symptoms of prostatitis and/or prostate enlargement, this would be a major contribution to the health and wellbeing of American men while saving the health care system tens of millions of dollars. Further elaboration of the prostatitis to prostate cancer model would qualify as a major medical breakthrough. Minimally, Dr.

Wheeler's research offers a unique 'patented' formula with little downside with a potentially tremendous upside for motivated men. Dr. Wheeler has a Patent on Peenuts*, per Attorney Chuck Sara, Dewitt Law group, Madison, Wisconsin.

Dr. Wheeler has under scrutiny from DOH & Board of Medicine since 2013. I was in prison (13 months) for giving a prescription: 1 shot (Lupron, 3 of 3 shots, in total) to help stabilize the prostate cancer! There is not prevising in the amendments that says no shots allowed. There are winging it to saying that a shot with a physician is felony for this court. It is demeaning and defamatory but a jail sentence that I couldn't bail out of, not to mention 13 months in Blountstown! A Guard for the Penitentiary named, Officer Shuler said, "I don't know what you're for, but you don't belong here". 3 years of probation and a loss of license! WOW! It all started with Diner, with the liling of the fuse and Zachariah embellishing it. I will remember that phrase, "Menace to Society". It was theatrics 101.

To state clearly, in 2015, the FDA, a Federal Agency mandated that no specific diagnosis would be required to perform a HIFU procedure while stating further, there was no indication for Prostate Cancer in doing a HIFU procedure. This should negate Judge Creasy's ruling a reprimand recommended against her, if not a dismissal from the bench, given her blatant ignorance and misjudgment for the facts. If the Judges involved in this caper are elected all should be disbarred for a willful act of negligence whereby, they conveniently denied an appropriate judgment of the law itself that should have been sufficient to overturn a prejudice ruling. More collusion and deception were clearly on display herein.

To Restate, In May of 2017, Dr. Wheeler gave the third of third shots (the other two shots were identical and given while Dr. Wheeler still

had his License) to a man with Prostate Cancer, as this man had no one else (other than Dr. Wheeler) who could extend his Prostate Cancer suppression. Shelley Cleveland, (Dr, Wheeler's ex-wife) decided to inform the DOH of this situation, a point validated by Dr. Wheeler's counsel. Shelley initially told the patient that Dr. Wheeler had his license revoked, thereby questioning a breach in her confidentiality. Her loyalties were clearly not with her boss and former husband but rather to selfishly teach a lesson, despite a yearly salary of \$75,000.00 various benefits including a new car every 3 years. The DOH seized the moment to attempt to entrap Dr. Wheeler.

In accordance with the Hippocratic Oath sworn to by all doctors at the time of receiving their medical degrees, Dr. Wheeler opted to assist this patient in need. Besides, giving any shot (while legal and not a criminal offense), was the lesser of two options. To allow this man to without the shot would potentially allow his cancer to grow and possibly spread beyond the Prostate in a process called metastasis. Had Dr. Wheeler not given the shot, a additional cascade of events would have taken place, not the least of which would be underserving anxiety for this man and his wife. Who really knows other than God, but Dr. Wheeler may have prevented a possible suicide in his application of common sense a "Good Samaritan" like approach? There are no laws governing the use of shots in Florida or any other State for matter, as shot given (again) is commonplace and is not a criminal act and therefore, does not require a License. Witness, as example, no Licenses are required to Botox (a neurotoxin) associated with Botox parties, Insulin shots for Diabetes, Epinephrine-pens for Bee Stings, Shots indicated to Prevent Pregnancy, Influenza shots, Endometriosis shots (women by another person), and/or a shot given by Dr. Wheeler or others including Nurses' aids, a Physician Assistant (PA) and guy and gals or Significant others and ordinary people. It is not Rocket science!

Patents: I had 3 Patents in total!

I have a third 'patent' issued 2019 while I am in prison for shot! It is about HIFU! It a single pass of ultrasound, 38-42 Watt. I have doubled the Energy for ultrasound making it lethal for prostate cancer. I have HIFU- EEA! ERIC DINER a Robotic Prostatectomy physician. He scolded me, by saying I was "Menace to Society". He could have recused himself but did not! Dr. Zachariah, Chairman of DOH and Board of Medicine, was threat to society an Evil person as Dr. Diner was Absent for the Charade.

I am here for the Veterans! There is no reason that a Veteran must have a biopsy. According to **FDA 'no biopsy for a HIFU patient' ... PERIOD!** I have had 2/3 patients with PSA 70 ng/ml (DEAD) and another patient was PSA of 3000.ng/ml (DEAD). The PSA 15 ng/ml, (STILL Alive). I have all men (Veterans and the non-Veterans) on my side, treat or not treat, that is the Question! A rising PSA and a 3T Multiparametric MRI analysis will tell the story, ... **not Eric Diner!**

"With all my heart, I want to say that I believe my Heavenly Father intervened when he put me in touch with Dr. Ronald Wheeler. I do not believe it was merely accidental. The direction I received came in a totally unexpected way for which I am most grateful".

Ray Cunningham 02/16/06

I had an Aphasia (stroke) 2.5 years ago. My best path is my Attorneys win my case! I am fit and mentally, I am progressing well, but I still need a Pardon by GOV. Ron DeSantis.

Another satisfied patient: Jerry Deplazes, October 24, 2005, "MEN AT RISK", Published in 2012. A Gleason Score of 6 (Graded from 6-10)

(Mildly, some Risk ---going to a ---significant risk - invasion)

Gleason 6 --- 7 ---- 8 ----- 9 ----- 10

PSA = 6.0 27 Biopsies Cores - (12 Biopsies Cores is ideal)

***REW* - Chronic Disease Management (NO Surgery)**

Radical Prostatectomy – **Proposed SURGERY**

Radiation Therapy – NO SURGERY

High Intensity Focus Ultrasound – NO Surgery

Cryosurgery – **SURGERY**

TOLD to J. Deplazes: By R. Wheeler, M.D. "If there is a need to clarify and/or validate any of the commentary within this document, please feel free me, to contact me directly. Based on the inherent success that you (J. Deplazes) has shown over the past 10 plus years, the treatment protocol is expected to continue unabated and successfully".

My Book is called, "Intentional Deceit", Published by Palmetto Publishing. Due out in May of 2023.

**North Charleston,
South Carolina, USA**

Attorney Jose Rivas in Orlando, Fl. I am pleading will you, and all your Partners to help me! It's a conspiracy of errors, collusion, corruption, defamation/slander and/or mistreatment for the facts. Judge Creasy is a misfit, Dr. Zachariah, the Chief for the DOH & BOM in echoing the prophetic phrase by Dr. Diner's "*Menace of Society*". Dr. Diner, (the so called "*expert*"), with his subjective opinion vs. an objective opinion called for by American Urological Association) in calling him (Dr. Wheeler) "*Board Certified in Fraud*" commenting in abstention, aided by Dr. Scionti's piling on, when he reversed his prior statement for approbation. Add to that Mike Harrell, a quasi-detective and quasi-journalist, was he state emphatic to Medscape (a doctors' blog), "*that to diagnose Prostate Cancer in the State of Florida, there is a law that says a biopsy is required!*" How pathetic! The State of Florida as it pertains to the DOH & BOM is "dead red wrong" in their castigation of an innocent man named, Ronald E. Wheeler, M.D. an excellent Medical Director and Surgeon, a man of faith, a noted Author, Research Specialist, and no claims against me in 30 plus years in practice, 'Patent Holder' X 3. When are we going to understand what is going on with Dr. Wheeler is a vendetta, a witch-hunt, pre-meditated collusion, fake news, corruption or simply stated greed, bruised egos and jealousy being bought and paid for!

We must know that Florida's with DOH & BOM has the money and Sarasota County has the money too. I am predicting: \$500 Million for DOH & BOM and \$300 Million for Sarasota County. Florida should be advised that the moneys should TAX EXEMPT.

I NEED THE GOVERNOR RON DESANTIS for a PARDON!

It's BEEN A LONG JOURNEY APPROXIMATING 11 YEARS! I need to get together with my friends, Veterans and Private patients to celebrate. If by chance, you're over-whelmed with clients; do you have another Attorney(s) that you Trust, Respect and hold Accountable too?

Ronald E. Wheeler, M.D.
